SPECIALTY FURNITURE

Today's health care environment is becoming more complex and demanding. Specialty Furniture's collection of furniture has been specifically designed for this environment and combines superior design and functionality with quality construction and durability. All the pieces in our collection have been carefully selected and tested to meet our exacting standards.

"Committed to Service" is Specialty Furniture's promise to our customer. Our service begins at the very beginning of your furniture purchase with helpful and educated representatives who can assist you in selection and design and follows through to the very end with friendly and on time delivery and installation. Specialty Furniture knows that without a true commitment to service we would not be able to deliver a reliable and stress free experience to our customer.

PRIMAREST® ADVANCED LOW HEIGHT BED

The PrimaRest® Advanced Low Height electric bed is the Best-in-Class bed for the Long Term Care market with built-in length and width extension systems making it flexible in all circumstances. The length adjusts to 80", 84", or 88" and the width can be adjusted to 35", 39", or 42". All width and length adjustments are tool-less, allowing for quick and easy adjustments. The PrimaRest® Advanced is a roll at any height bed equipped with a central locking system with easy access to the lock and unlock pedals, even at the lowest height. The PrimaRest® Advanced bed features an easy to disinfect pan deck with a travel range of 7" to 30" high and includes Trendelenburg/Reverse Trendelenburg and Comfort Chair positioning. Special head section composite non-metal assist rails use a quick connect, tool-less installation/removal to easily adapt the bed whether rails are required or not. Standard features include Trendelenburg / Reverse Trendelenburg, Motion Sensing Underbed Lighting, Footboard Staff Control Panel w/Lockout, 2 USB plugs for Resident Electronics, Baseboard Wall Bumper, IV Pole Holder, Hand Control with Rail / Headboard Clip. 600 lb weight capacity, 4 year warranty on electronics and 15 years on the frame.

Two USB Plugs for Personal Electronics

JOERNS EASYCARE RIL ELECTRIC LOW HEIGHT BED

The new Joerns EasyCare® RIL's special Toroidal architecture engineered steel frame is up to 30 times stronger than standard angle iron. The EasyCare adjustable low height bed has a proven grid-style sleep surface that provides security for resident positioning, air flow around the mattress system and easy to clean openings. The EasyCare bed is on stable legs at all travel heights and only mobile in the low position for those facilities where great stability is desired at all care heights. Other features include ultra quiet DC motors, baseboard wall bumper, four corner mattress stops, choice of side rail options, laminate head and footboards in a choice of shape and color, and a 7" to 30" travel range. Bed comes standard with a rail pendant holder but an optional pendant holder for mounting on the head board is available. The head board pendant holder can be mounted on the resident side of the head board for use when rails are removed from the bed and a location to store the hand control is needed or can be mounted on the back side of the head board for use when you need to hide the hand control away from the resident. 600lb weight capacity, 4 year warranty on electrical and 15 years on the steel frame.

EASYCARE RAIL OPTIONS

HEAD SECTION RAILS (STANDARD - HR)

These rails connect to the head section main frame of the bed and move up and down with the head section whenever it is gatched so they provide safety support at every angle. Top of rail is covered with a vinyl cap for protection against the metal rail. Meets all CSA/FDA bedrail entrapment guidelines.

ASSIST HANDLES (OPTIONAL - AH)

Ergonomically designed to assist residents in and out of bed.

Mattresses

PRIMAREST® ADVANTAGE FOAM THERAPEUTIC SUPPORT SURFACE

The PrimaRest® Advantage features a sculpted top layer with independent load-bearing cells that help reduce shear while creating airflow, for outstanding pressure redistribution, support and comfort. The 3 layer high density foam design provides 3 anatomic zones in the top layer and the super-soft sloped heel section helps to reduce pressure on the heels. The easy to clean premium all-way stretch cover comes standard optimum comfort & pressure redistribution. Firm foam perimeter prevents collapsing of the sidewalls to ease egress and ingress and reduce entrapment. Designed for high risk / Stage 1 & 2. Fire sleeve over the foam core to meet the strictest of Canada/USA fire and flame retardancy standards.

SPECIFICATIONS

OVER-ALL LENGTH - 80"

FEATURES

Heel Zone
Softer foam material and sloping heel zone reduces pressure

Fire Sleeve
Comes standard with a Fire Sleeve over the foam core

Firm Perimeter
Firmer foam outer rim supports transfers and entrapment compliance

PREVAMATT DELUXE FOAM THERAPEUTIC SUPPORT SURFACE

The PrevaMatt Deluxe features double layered open cell foam with a viscoelastic memory foam top layer and high density foam base. Hex Diamond cuts in the top layer incorporate Surface Modification Technology (SMT™) which produces alterations in pattern, size of pattern, spacing between patterns and depth of cut to protect high risk areas. This results in zoned pressure redistribution with improved air circulation and maximized comfort. PrevaMatt Deluxe Incorporates a sloped heel section to redistribute pressure in the delicate heel and lower leg area. A 4" foam firm perimeter provides added stability during resident transfer and helps resident safety by reducing risk of entrapment between mattress and rails. Strategically located cuts in mattress base promote easier flexing during bed frame articulation which reduces wear and tear on mattress/cover and prolongs mattress life. The easy to clean cover comes standard in two way stretch material for optimum comfort & pressure redistribution. Available with optional Raised Perimeter. Designed for Prevention to Stage 1 use. Meets Canadian flame and fire retardant standards.

SPECIFICATIONS

OVER-ALL LENGTH - 76", 80" or 84"

PRIMA-GEL DELUXE GEL THERAPEUTIC SURFACE

The Prima-Gel Deluxe combines the comfort and pressure reduction of a foam therapeutic surface with the pressure relief and temperature regulation of gel. In this unique process our therapeutic foam core is covered with a 3/4" pillow top gel honeycomb topper in the torso and foot section to deliver unparalleled comfort, temperature control and wound prevention. The gel topper distributes the pressure more evenly over these regions resulting in better pressure interfaces. The honeycomb design of the gel allows for better temperature control around the sensitive pressure areas of the body. The Prima-Gel Deluxe has an incorporated high density foam perimeter to aid in transfers as well as to prevent bed entrapment. The special Recovery-5® Stretch cover provides fluid protection as well as a softer feel and stretch compared to regular nylon covers.

- 3/4" pillow top gel honeycomb comfort topper in torso and foot sections regulates temperature reducing perspiration and provides immersion for pressure reduction as well as increased comfort
- Dual density foam core with sloped heel zone to relieve pressure in sensitive foot region
- Firm perimeter border Allows for easier transfers and a firm supportive edge to meet all bed entrapment guidelines
- Recovery-5® cover ensures protection from fluid while still allowing maximum immersion with its stretch capabilities

PRIMA-GEL ELITE GEL THERAPEUTIC SURFACE

The Prima-Gel Elite combines the comfort and pressure reduction of a foam therapeutic surface with the pressure relief and temperature regulation of gel. In the critical torso section of the Prima-Gel Elite we incorporate a larger and deeper honeycomb gel design to provide maximum pressure relief and temperature control for Stage IV pressure ulcers. The sensitive heel section of the Prima-Gel Elite is covered with a 3/4" pillow top gel honeycomb topper to deliver unparalleled comfort and wound prevention. The gel topper distributes the pressure more evenly over these regions resulting in better pressure interfaces. The honeycomb design of the gel allows for better temperature control around the sensitive pressure areas of the body. The Prima-Gel Elite has an incorporated high density foam perimeter to aid in transfers as well as to prevent bed entrapment. The special Recovery-5® Stretch cover provides fluid protection as well as a softer feel and stretch compared to regular nylon covers.

- Full Torso Section large honeycomb gel pad for maximum pressure relief, comfort and temperature control in critical pressure area of the mattress
- 3/4" pillow top gel honeycomb comfort topper in foot section provides immersion for pressure reduction as well as increased comfort
- Dual density foam core with sloped heel zone to relieve pressure in sensitive foot region
- Firm perimeter border Allows for easier transfers and a firm supportive edge to meet all bed entrapment guidelines
- Recovery-5® cover ensures protection from fluid while still allowing maximum immersion with its stretch capabilities

P.R.O. MATT® PLUS CONVERTIBLE AIR THERAPY SURFACE

The P.R.O. Matt® Plus is a non-powered mattress replacement system featuring Pressure Redistribution Optimization (P.R.O.) Technology. With the addition of an optional control unit, the mattress provides powered immersion or alternating pressure therapy, allowing the use of one mattress for both pressure ulcer prevention and treatment. The unique P.R.O. Technology design requires no adjustments or manual inflation. The mattress features a sophisticated internal hoses and valve system that is invisible to the caregiver and patient, but enables the surface to automatically adjust to each patient's weight and body profile. In the non-powered mode, the P.R.O. Matt Plus is indicated for prevention through Stage II pressure ulcers. With the addition of an optional control unit and based on individual patient assessment, the P.R.O. Matt Plus can be used for the treatment of uncomplicated Stage III or IV pressure ulcers. Maximum weight capacity 500lbs. Warranty: Five-years, non-prorated; Cover: One-year.

MATTRESS FEATURES AND BENEFITS:

- Four-zone system (head, shoulder, torso and foot) inner air core reproduces the surface pressure profile of a therapeutic low air loss mattress
- One-inch viscoelastic topper enhances pressure redistribution and patient comfort
- Surrounding firm perimeter provides stability during patient care & Patient safety by eliminating gaps between frames and siderails
- Horizontal air tubes are superior to other manufacturers vertical tubes, as they provide better pressure relief & do not kink if bed is gatched
- Self-calibrating design needs no manual inflation
- Recovery-5® stretch cover is standard, waterproof & is a low friction and low shear surface

Upholstery Options

VINYL UPHOLSTERY COVERINGS

A variety of different vinyl upholstery coverings are available to choose from. Vinyl provides ease of cleaning with new “textured” and patterned looks. Choose from major manufacturer’s patterns and colours such as Douglass, Morbern and Momentum. Vinyls meet all flame and fire retardency standards. Contact your sales representative for available patterns and colours to choose from.

PRINTED CRYPTON UPHOLSTERY COVERINGS

A variety of different patterns and colours are available and printed on to a Crypton base cloth. Crypton’s® patented technology is engineered into the fabric, encapsulating every fibre with stain, odour, and bacteria resistance. The breathable moisture barrier is permanently integrated into the fabric, ensuring a complete and proven performance system from the fibres up. Contact your sales representative for available patterns and colours to choose from.

WOVEN CRYPTON UPHOLSTERY COVERINGS

A wide variety of woven textile patterns and colours are available in two different grade/price levels. Crypton’s® patented technology is engineered into the fabric, encapsulating every fibre with stain, odour, and bacteria resistance. The breathable moisture barrier is permanently integrated into the fabric, ensuring a complete and proven performance system from the fibres up. Choose from major manufacturer’s patterns and colours such as Coral, Douglass and Momentum. Woven Cryptons meet all flame and fire retardency standards. Contact your sales representative for available patterns and colours to choose from.

#508 FAUX WOOD GRAIN TAPERED METAL TABLE LEGS

Our four legged metal tapered leg bases with faux wood grain finish are durable, lightweight and sturdy. The highly scratch resistant finish is applied using a 3 step heat transfer process ensuring the look and feel of wood. Legs are securely fastened with a metal corner bracket to the base apron. Standard height is 28" but custom heights are available upon request. Bases will accommodate square tops sizes 36"x36", 38"x38", 40"x40", 42"x42", 48"x48" and also 48" round. All legs have a height adjustable glide on the bottom for levelling the table. Available in 6 different wood grain finishes that will not chip, see page 69 for options.

#500 ROUND METAL TABLE LEGS

The #500 round legs are a 2.5" diameter, 14g steel leg. All legs have adjustable glides on the bottom to help with levelling. Each leg has a flat metal mounting plate at the top of the leg to allow for easy mounting to any table top. Standard height is 28" but custom heights are available upon request. Choose from any of our standard epoxy coatings for the finishing on the legs. Legs are available with optional 3" adjustable height cup glides and also available with optional casters on all four legs or just two legs.

#504 WOOD TABLE LEGS WITH APRON

Our four legged bases are made of solid hardwoods and finished in any of our standard wood finishes. Legs are securely fastened with a metal corner bracket to the base apron. Base aprons are available with a cut out to allow chair arms to access under the table. Standard height is 28" but custom heights are available upon request. Bases will accommodate square tops sizes 36"x36", 38"x38", 40"x40", 42"x42", 48"x48" and also 48" round. All legs have a height adjustable glide on the bottom for levelling the table.

Specialty Tables

Tables

ADAPTIVE DINING TABLE

Our rehab Adaptive Table is an innovative product with custom settings for each of the 4 seat locations. Each location is height adjustable from 27" to 37". The base is made from rugged tubular steel coated with static polyester. Table tops are 1" laminate coated with rounded corners and edged in fungicidal (anti-mold) PVC. Table comes with one transport wheel on the end of one leg for easy transporting by tipping the table up slightly on to that wheel and rolling the table. Table has Revolving Centre Condiment Tray, Adjustable Slide Out Depth Adjustment on Sectional Trays and Weight Compensating Column Springs. Bases are baked on brown epoxy finish for long lasting durability. Available in Walnut (shown) or Natural Maple laminates.

SPECIFICATIONS

Frame:

- Twelve gauge (.100") steel structure
- Integrated transport wheel
- Non-marking, adjustable levelling feet

Tabletops::

- 1" tabletops covered with 1/16" quality laminate
- 2mm matching laminate, heat-sealed, vinyl edge finish

Dimensions:

- Overall 49" x 49"
- Add 7" per panel if extended
- Approximate weight 150lbs (68kg)
- Individual height adjustable tabletops from 27" to 37"
- Each tabletop panel 24.5" x 24.5"

SPFITDC*4PA-SP-W	Adaptive Dining Table, 4-seat, Walnut

FEEDING STOOLS

Our feeding stool includes a swivel mechanism featuring a 5.5" pneumatic seat-height adjustment and uses high-density, high resilience foam for added durability and comfort. A five prong heavy-duty nylon base ensures stability. Base, casters and trim come standard in black. Available with or without back. Optional self locking casters are available that lock automatically when someone sits on the stool for ultimate safety.

ITEM

DESCRIPTION

SPFNT1000	Feeding Stool, No Back, Standard Casters
SPFNT1000-LC	Feeding Stool, No Back, Self Locking Casters
SPFNT1000WB	Feeding Stool, With Back, Standard Casters
SPFNT1000WB-LC	Feeding Stool, With Back, Self Locking Casters

FLIP TOP OPTION

The flip top option allows the top to be flipped up vertically in order to provide extra space for storing the table. This option is available on any of the 100 series of tables. Add "FT" after the base number in the table code number to add the Flip Top option on the table.

SELF LEVELLING GLIDE OPTION

All tables come standard with a nylon, manually adjustable glide. The self levelling glide is available as an option on all the 100 and 500 series tables. This glide will automatically adjust to any unlevel surfaces without having to bend down and adjust the glide. Perfect for eliminating wobbly tables every time they are moved to a different location on the floor. Add "SL" after the base number in the table code number to add the Self Levelling Glide option on the table.

CASTER OPTION

Casters can be added to any of the 100 or 500 series tables. Tables can have all four casters (4C) or two casters/two glides (CG) depending on your preference. Add "4C" or "CG" after the base number in the table code number to add the caster options on the table.

CUSTOM INLAY TOPS

Tops can be customized to have inlay designs such as the games inlay shown. Custom laminate designs with inlay poly resin seams can also be done.

DROP LEAF EXTENSION

This 10" x 20" drop leaf extension is available on the 42x42 or 48x48 square table tops as an option. The drop leaf flips out and locks in to place for residents in wheelchairs to have a table platform close to them and then neatly folds and tucks under the table when not in use. Two drop leaves per table mounted on opposite sides of the table so that the two other sides of the table can be used for normal seating.

Prefix		Base #		Options		Top Size		Edge Type		Table Code #

PVC EDGE (PV)

1 1/8" x 1/4" T-mold PVC edge provides a protective edging on any table. Available in any of the standard edge/base colours. Use "PV" as the code for this edge when creating your table code number.

PVC BULLNOSE EDGE (PB)

1 1/8" x 3/4" T-mold PVC edge provides a protective edging on any table. Available in any of the standard edge/base colours. Use "PB" as the code for this edge when creating your table code number.

WOOD BULLNOSE EDGE (WB)

Solid wood, bullnosed edge is 1"x1" in size and is available in solid oak or maple. Edge can be stained to match any wood finish. Use "WB" as the code for this edge when creating your table code number.

POLY RESIN EDGE (PR)

Special formulated poly resin is poured in to an edge mold as a liquid and then solidifies to become a solid, seamless one piece edge. Colour is solid all the way through the edge so any scratches can be sanded smooth with steel wool and shined back to the original beauty with Armour-all. Use "PR" as the code for this edge when creating your table code number.

RAISED SPILL PROOF POLY RESIN EDGE (RS)

Same qualities as the poly resin edge above except built up on the edge to prevent any liquids that are spilled from rolling off the table. Use "RS" as the code for this edge when creating your table code number.

HOYER ADVANCE LIFT

The Hoyer Advance is compact, yet able to perform an outstanding range of transfers. Whether from the floor or onto a healthcare bed, the Advance copes with ease. The Advance's unique tapered leg design allows the lift to get even closer to the widest of obstacles. This is especially useful when encountering large chairs, bulky commodes, and wheelchairs. The tapered design also ensures that the resident feels safe and secure during the transfer. Comes standard with two batteries, charger and wall bracket.

Exceptionally Versatile
No-tools folding design allows for compact storage

Oversized Handle
The oversized handle provides a large surface area, from which the caregiver can maneuver the lift before use.

Design
The triangular fold design ensures two very important functions.
1. The lift stands unaided when being stored or transported.
2. The lift can be safely left with the knowledge that it will not become unstable while not in use.

Footpad
The push footpad has been designed to reduce the force needed to initiate movement when maneuvering the stationary lift in a forward direction.

HOYER PRESENCE LIFT

The Hoyer Presence lift has been engineered and designed to handle almost any resident handling task. Along with the Stature lift, the Presence can lift residents from the floor as well accommodate transfers to higher surfaces. The 500 lbs safe working load and greater spatial area make this lift a perfect fit for larger residents. Comes standard with two batteries, charger and one wall bracket.

Interchangeable Cradle Bars

Part of the restriction of using certain lifts are the slings that you can use on the product. The Presence however, gives you a choice of sling systems.

Powered Base

Operating the Presence is as simple as the push of a button. The base includes two electric actuators which allow the caregiver to open and close the legs without bending or twisting.

Scale Option

Easy to use with intuitive controls, the digital scale is NAWI Class III rated and ideal for patient monitoring. Importantly, it does not compromise lifting height.

Foot Pad

Ergonomic foot pad to assist with initiating movement.

HOYER JOURNEY SIT TO STAND LIFT

Our new Journey lift is an ultra compact, portable folding standaid with best-in-class functionality. It is compact and lightweight allowing caregivers to maneuver in tight spaces while folding for easy storage or transportation. The first on the market adjustable cow-horn mechanism supports a range of patient heights and sizes, allowing your facility to have one lift that meets the needs of many. Our careful attention to product design with the Journey ensures that both the caregiver's and the resident's needs have been met. Comes standard with two batteries, charger and one wall bracket.

Unique Folding Design

The Journey's unique folding design stands unaided for easy storage. The compact design also provides an ideal size for transporting. It is the only standaid on the market that folds.

Adjustable Cow-Horn

The unique adjustable cowhorn mechanism supports a range of resident heights and sizes. It is also ideal for transfers from low chairs.

Adjustable Kneepad

The sculpted knee pad is easily adjusted for ultimate patient comfort. Adjustable with one hand.

Newly Designed Bump Guard

Our newly designed bump guard provides additional protection against base plates and paint finishes in your facility.

GENEVA RL8 COMBI CHAIR LIFT

The RL8 provides a dignified solution for residents requiring assistance getting in and out of recumbent bathtubs. The RL8 Combi-Lift is for residents that desire or need to be in a seated position, however, by attaching the stretcher components it can be converted to a stretcher lift for those requiring to be in a supine position. The conversion from a bath chair to a stretcher lift is simple and requires no tools. This unique feature allows the versatility needed to accommodate a broader resident population.

The wide and padded seat and stretcher surface, ergonomically designed safety arm supports, and safety belts ensures a comfortable and secure bathing experience for the resident. The seat and stretcher surfaces are made of a soft and durable material that is non-water absorbent, making it easy to clean and maintain.

The foot-operated raise and lower function control is strategically located on the rear of the bath lift, allowing the caregiver the use of both hands to aid the resident. The belt-driven raise and lower function is smooth and quiet, and the large hospital grade castors make moving the RL8 effortless. Manufactured with the highest quality materials, including stainless steel components, the RL8 will provide years of service and low cost of ownership. Optional scale with digital read-out is available.

Low and narrow chassis that easily maneuvers under beds and bathtubs.

Foot activated emergency stop button and magnetic charger port.

Commode Seat for perineum cleaning/toileting, includes lid to cover opening.

Comfortable back rest made of a soft and durable material that is easy to clean.

GENEVA RS8 SUPINE BATHING TUB

The Geneva RS8 is designed to bathe highly dependent residents safely and comfortably and is compatible with a wide range of transport and lifting devices. The key-hole shape enhances patient comfort with extra room for the shoulders and arms, plus allows the caregiver closer and greater access to bathe the resident. The height is raised or lowered at the touch of a button and allows the caregiver to work at the proper height, thus eliminating back strain. The optional Auto-fill eliminates waiting and/or observation time when pre-filling the bathtub to a pre-set level.

The smooth and soft lines of the Geneva RS8 will enhance the look of your bathing area and allow for effortless maintenance and cleaning. Standard features include adjustable height, Air Spa Micro-Bubble system for therapeutic relief without disinfection concerns, thermostatic mixing valve with anti-scald protection, battery backup, built-in disinfection system and hand held shower wand. 5 year warranty on shell & finish, 3 years on moving parts.

STANDARD FEATURES

- Thermostatic Mixing Valve with anti-scald protection that dispenses 15 gallons per minute for fast tub fill.
- Battery Back-up in case of power failures.
- Built-in Disinfection System that is the most time-efficient solution for disinfection of the bath's external surfaces and minimizes the risk of cross-infection.
- Handheld Shower Wand for hair and upper body washing, which can be used at the same time the tub is filling.
- Analog Thermometer for monitoring tub-fill and shower wand temperatures.
- 3/4" Supply Lines constructed of stainless steel.

VICTORIA RG9 FREESTANDING BATHING TUB

The RG9 Victoria is a freestanding tub that allows the caregiver 360° unobstructed access to the resident. The low threshold and wide side-entry door allows easy access for residents with various degrees of mobility and the built-in contoured seat allows the resident to sit comfortably and safely in a slightly reclined position. For your dependent residents, the RG9 Victoria is specifically designed for use with the RL9 Bath Lift, which provides seamless transfers from bed-to-bath in a comfortable and safe seated position. The sleek exterior design of the RG9 Victoria bathing system will give your bathing area an upscale look.

Caregivers will enjoy the RG9 Victoria for its ease of use and the improved quality of care they can provide the resident. Featuring a full range of standard and optional features, the RG9 Victoria bathing system is designed to enhance the bathing experience for the resident.

STANDARD FEATURES

- Thermostatic Mixing Valve with anti-scald protection that dispenses 15 gallons per minute for fast tub fill.
- Built-in Disinfection System that is the most time-efficient solution for disinfection of the bath's external surfaces and minimizes the risk of cross-infection.

Tubs

ATLANTIC RR7-II RECLINING BATHING TUB

The RR7-II Atlantic is designed for healthcare facilities looking for a more time efficient and labor-saving bathing solution. The RR7-II Atlantic has a unique tilting function, which gives residents with challenging conditions to recline in a contoured seat and quickly become immersed in warm water. At only 24 gallons to pre-fill the foot well, water usage and the associated costs are greatly reduced. The most unique attribute of the Atlantic is its ability to raise and tilt the resident while bathing. The water in the foot pool rises to warm and clean as it redistributes the bath water over the body. The side door raises up out of the way to allow safe, easy access for all your residents. This particular tub is versatile enough to allow ambulatory residents to step in, as well as providing safe access to those using standing or walking aides and even those in wheelchairs.

The Atlantic has an anti-scald mixing valve with a and an optional auto fill feature that quickly fills the tub at a rate of 15 gallons per minute. Choose from right or left swing-up door with Rane's trademark KeyLock™ mechanism that eliminates leaks. 5 year warranty on shell & finish, 3 years on moving parts.

Bedpan Flusher and Disinfector

DEKO 190 BEDPAN FLUSHER AND DISINFECTOR

The DEKO 190 is designed and constructed to meet the standard performance and design requirements stated in ISO EN 15883-1 Washer-disinfectors - Part 1 and Part 3: Requirements and tests for washer-disinfectors employing thermal disinfection for human waste containers. Thanks to the unique, patented fresh water recirculation principle of the DEKO 190, the machine has a minimal need for energy and water in relation to the capacity and efficacy of the adjustable process cycles. Also the thermal disinfection of outlet, water tank and pipework in every cycle is of great importance and only available in the DEKO 190. The DEKO 190 is intended for emptying, flushing, cleaning and thermal disinfection of reusable waste containers. Gross wash chamber volume - 72L.

Comes standard with a holder for 2 bedpans, 4 urine bottle nozzles, fold down wash shelf, detergent pump, and detergent container housing.

FEATURES

- 3 rotating plus 7 fixed wash jets
- Automatic detergent dosage
- Indication for insufficient volume of detergent to complete cycle
- Load temperature protection and over temperature cut-outs
- Automatic foam and washing water pressure control system
- Sound and heat insulated
- Vapour Condenser
- Height adjustable feet
- Powerful circulation water pump, output 600 L/min
- Cycle Phase Indication
- Display indicates cycle completion
- Fault indication and coded information
- Access to regulation of critical process parameter values with authorized person entry code only
- Component test mode for preventative maintenance

SPECIFICATIONS

- WIDTH - 23.6" (600 mm)
- DEPTH - 24.8" (630 mm)
- HEIGHT - 57.5" - 63.4" (1460 - 1610 mm)
- CHAMBER WIDTH - 18.9" (480 mm)
- CHAMBER DEPTH - 14.2" (360 mm)
- CHAMBER HEIGHT - 25.2" (640 mm)

20 - Light Oak

Natural Maple

Note: Actual colour may vary from picture shown due to printing limitations. Please request an actual sample if needed.

ALUMINUM FRAME CHAIR OPTIONS

Caster Options

Webbed Seat

Metal Glides

Nylon Glides

NYLON GLIDES

Nylon glides are the standard glide if no glide is specified. They work well on all types of surfaces.

METAL GLIDES

Metal glides are for use on carpeted surfaces only

FELT GLIDES

Felt glides are for use on vinyl or ceramic surfaces and eliminate the vibration noise that occurs when using regular glides. Do not use on carpeted surfaces. Felt does wear out quicker than nylon so the glides do need to be replaced more often.

FRONT CASTER OPTION

Casters are available for most wood frame chairs (see seating pages for exact models they are available on.) The casters are installed on the two front legs and regular glides are used on the back legs. Chair is still stable when someone is sitting in it but is a lot easier to move when there is no weight on the legs.

Seating Specifications

WOOD SEATING SPECIFICATIONS

- 1.0 Frame: All upholstered (non-exposed) frame lumber shall be sound grade dried (7%), mixed hardwood for strength and dimensional stability. All exposed wood shall be milled from kiln dried hardwood, premium grade selected free of visual and structural defects, beechwood or alternate hardwood.
- 2.0 Frame Assembly: All joints are mortise and tenoned, hydraulically assembled, then glued and pinned for extra strength. Corner blocks are fitted to leg and rail and attached with low root screws and glue. All exposed parts are machined round and are sanded to a smooth finish.
- 3.0  Standard Wood Finish Process: All exposed hardwood frames are finish with a catalyzed lacquer using special environmentally friendly, water based process and offers superior resistance to abrasives and chemicals commonly found in a healthcare/hospitality environment. This finish is highly resistant to hot/cold checking and successfully tested to temperature ranges between 120 deg. F to -5 deg. F.
- 4.0 Foam: Upholstery and cushion foam shall be high resiliency (HR) of varying density and flame/fire retardant. All foam, at a minimum, shall meet California Technical Bulletin 117 (TB-117) for flame and fire retardancy. Foam cushioning is selected for comfort and durability.
- 5.0 Inspection: The entire frame and upholstery shall be inspected during the Manufacturing process and again after final assembly. Tailoring shall be neat, trim and applied in a professional manner. All legs will be levelled on our automated levelling machine.

CASEGOOD SPECIFICATIONS

- 1.0 Top Construction: One piece 3D laminate Thermovynyl wrapped over top and 4 edges, with radius corners and edges. Contract grade MDF core with minimum density of 45 lbs. Backer, white melamine
- 2.0 End Panel Construction: TFL (Thermally Fused Low-pressure laminate/ melamine) panel with contract grade particle board, 45 lbs. minimum density. Edges are banded with PVC to seal all exposed core and to prevent moisture absorption.
- 3.0 Drawer Front and Kick Plate Construction: One piece 3D laminate Thermovynyl wrapped over drawer faces, door faces and kick plate with Contract Grade MDF, 45 lbs. minimum density core.
- 4.0 Drawer Construction: (1) Drawer boxes-four-sided, double dowelled, glued, and screwed jointed with a recessed 1/8" fiberboard bottom. Each box shall be vinyl wrapped and moisture sealed. Bottom in box will be glued and stapled to drawer box.(2) With epoxy coated metal glides, drawer bottom and back are 1/2" thick white melamine.
- 5.0 Doors: Soft closed European hinges used to prevent sudden slamming noise with varying degrees of swing dependent upon the case.
- 6.0 Backs : (Bedside cabinet and Dresser) Full 3/4" thick white melamine for weight counter balance.
(Wardrobe)All shall have a 3/4" thick top rail that allows for installation to wall and combo of 3/4" and 1/8" thick back for rigidity.
- 7.0 Rear Casters and Front Glides: All units shall have two rear nylon casters for ease of mobility and two front adjustable height glides for unit levelling.
- 8.0 All units are vented in the back to assist in removing moisture and odors.
- 9.0 All edges and corners are radius or softened to prevent serious Injuries In case of a fall and also premature wear and tear.
- 10.0 All tops, drawers, doors and kick plate can be easily replaced in the field.

Table Specifications

TABLE SPECIFICATIONS

1. Wood Bases: All hardwood shall be kiln dried solid lumber, premium grade selected free of visual and structural defects, species as specified per product. Bases come standard with adjustable height nylon glides for easy levelling of the table.
2. Metal Bases: All steel bases are 14g to 16g steel with all welds ground smooth and polished to a flawless finish. Steel is coated with a baked on powder epoxy coating in a choice of colours. All cast iron bases have a die cast bottom section with a 16g steel column and finished in a black epoxy coating. Bases come standard with adjustable height nylon glides for easy levelling of the table.
3. Top Construction: High Pressure laminate surface as specified with a contract grade particle core with minimum density of 45 lbs and a phenolic balance sheet on the underside. Edges to be pvc, wood, or poly resin as specified per product.
4. Standard Wood Finish Process: Standard finish shall be comprised of a high solid (over 40%), catalyzed, conversation lacquer offering superior resistance to abrasives and chemicals commonly found in a healthcare/hospitality environment. This material must be highly resistant to hot/cold checking and successfully tested to temperature ranges between 120 deg. F to -5 deg. F.

WARRANTY

The original purchaser of Specialty furniture is protected against defective workmanship and components for a period of five years from the date of purchase. This warranty does not cover upholstery coverings or table laminates unless the claim is due to poor workmanship in application. This warranty does not cover transportation costs to and from the factory/repair depot. Specialty Furniture will replace or repair defective furniture at our option free of charge. In no event shall liability under this warranty exceed the original purchase price of furniture. No credit for repairs will be allowed without specific written authorization. This warranty does not apply to furniture damaged by accident, abuse, neglect, or misuse; unauthorized repairs; or freight damage

ANNUAL BED & MATTRESS PREVENTATIVE MAINTENANCE PROGRAM

Our annual Preventative Maintenance Program for Beds & Mattresses includes:

- Testing of all bed functions
- Inspection of all wiring
- Check to ensure all reinforcements, nuts, bolts, and screws are securely fastened and in place
- Testing of hand control functions
- Inspection of casters and brakes
- Lubrication and cleaning of all gears and pivot points
- Check mattress covers for wear and rips
- Testing of all air control units and air surfaces attached to the bed.
- Provision of a comprehensive report by bed, serial number and room number of all inspected beds
- Consultation with staff if parts and repair services are required

ANNUAL BED ENTRAPMENT PROGRAM

Our annual Bed Entrapment Program includes:

- Testing of all bed systems to Health Canada's bed entrapment guidelines
- Testing conducted using the B4000 Bed System Measuring device.
- Summary report of testing results provided in Excel format

ANNUAL MOBILE/CEILING LIFT INSPECTION AND MAINTENANCE

Our Annual Inspection and Maintenance program for Mobile and Ceiling Lifts includes:

- Weight testing at 100% of Safe Working Load
- Inspection of lifting straps, actuators, limit switches, retaining clips, plastic plugs, and end covers
- Check to ensure all hardware is securely fastened and in place
- Testing of battery and charger output
- Testing of hand control functions
- Inspection of all wiring harnesses, emergency lowering function, casters, and brakes
- Lubrication of all gears and pivot points
- Inspection of all slings for wear and rips
- Testing of all ceiling track mounting brackets, hardware and end stops
- Inspection and adjustment of mounting brackets, lock splits and end stop fasteners for ceiling tracks
- Inspection and test charging for constant or end rail units on ceiling tracks
- Inspection of all ceiling track traverse trollies, gates, switch tracks and turntables
- Weight testing of all track "drop" locations at 100 percent of safe working load on ceiling tracks
